
Input prompt x: "Einstein's Theory of General Relativity proposes that gravity is the warping of "
Target token: "space"
Target model
$v(x)$
Baseline model
$v^{\text{base}}(x)$
Shared across different models
Theory + Relativity
General + Relativity
gravity + warping
Theory + Relativity
General + Relativity
gravity + warping
Observed only in individual models
Einstein's + of
Theory + proposes + of
the + warping + of
Generalizable interactions
an interaction is consistently learned by different models trained on the same task
Non-generalizable interactions
an interaction is specific to individual DNNs and less likely to transfer
